I firmly believe that it is time to end this very expensive court case that is costing taxpayers millions just because one company (Microsoft) makes a better product than it's competitors, thus sells more. It is lining the pockets of competitor big wigs and lawyers. Of course they would like to drag it on. I have urged Utah's Attorney General to go along with other states in bringing this to a halt and hope that the Justice Department can mitigate this before any more money is spent.
